XRecorder MOD APK is a high-quality screen and video recording application for Android devices. With just taps that couldn't be easier, you've completed the smoothest, most vivid screen recording. And importantly, there is no limit on recording time like other common screen record applications. Introduce about XRecorder Screen Recorder & Video Recorder When do you need to record the screen? There are many non-static things we want to record from our phone or tablet screen: chat between two people, manipulation using an application such as photo editing, gameplay of a game, Live programs... New you will need a specialized application that will record all the happenings on your phone screen, in a way that is simple, easy to use and without interruption. Demand always goes with supply. But not every application is really what you need or has the ability to optimize your requirements. You may have several options when searching for information about these functional apps. But I recommend using XRecorder. Why XRecorder? Here, I go right into the strengths of XRecorder and its outstanding features. XRecorder is a "four nos and one yes" screen recording app No watermarkNo watermarkUnlimited recording timeNo Root NeededHD quality available With m,e satisfied at the same time these 5 bullet points, not every screen recording app can do it. Especially about the watermark that makes us extremely inhibited. Specifically, with XRecorder, you can record your screen completely free in full HD quality (1080p, 12Mbps, 60FPS). If you don't like it, you can still optionally choose the quality from 240p to 1080p, and also choose the FPS (15FPS to 60FPS). All recording in XRecorder has no time limit, you can shoot as much as you want for as long as you want. Of course, the longer the recording, the more space it takes up, so make sure your phone has plenty of free space for this screen recording. Outstanding features of XRecorder Record screen with Facecam This front-facing Facecam feature helps you record video chats, in which each person's expression is clearly recorded with a small Facecam overlay window. A special point is that you can customize this window size arbitrarily, to hide things to hide (like do not want to show the face of people chatting with you) or show things to show. The ability to customize, in my opinion, is a very psychological point of XRecorder, proving that the creators of this application have carefully studied the user's mind. Record screen with sound This is the main feature of the app, but I put it last. The reason is because I specifically mentioned this ability of XRecorder at the beginning, above. When using XRecorder, just touch the activate button and you can record everything that is happening on the screen with sound (or not) and the video parameters you have selected. The post-production is extremely comfortable After the screen recording is complete, you can continue to use the basic set of editing functions in XRecorder to quickly edit the video: trim, crop, change video playback speed, simple merge, add music, brush and text tools to directly add necessary notes, sticker library... All in all, this application is simple but very useful for everyone. APKMODY's recommendation for you: Mobizen Screen Recorder. Download XRecorder MOD APK for Android Finally, you save the file on your phone or in the cloud for online storage. Share on a variety of social networks such as YouTube, Instagram, Twitter, IGTV, Facebook. XRecorder currently supports screen recording on many platforms such as Periscope, Bigo Live, musical.ly, TikTok, YouTube, Twitch... Actually, the list of supported apps doesn't have all apps, but it already includes those popular platforms today. So, I think it is enough. NameScreen RecorderGenreToolsVersion1.2.6.7DevelopersKimcy929IDcom.kimcy929.screenrecorderSize4.1MRrequirement6.0 and upMOD FeaturesPro UnlockedDownload40.774.286+Download Download Screen Recorder MOD APK with Pro Unlocked. Unlocked Premium. Unlocked VIP. Unlocked Pro. Free. MOD Paid. To download Screen Recorder (Pro Unlocked) APK and other applications at ApkSoul.net you should see the instructions below. You can download it by clicking the download button below the article. Then wait a few seconds for the system to automatically download the Screen Recorder MOD APK / DATA file To install software anywhere else, you have to enable installation from third-party sources. Enable the "Unknown Sources" setting: Go to Menu > Settings > Security > and check for unknown sources so that your phone can install applications from sources other than the Google Play Store. Once you have completed the above step, you can go to the "Download" folder in the file manager and click on the downloaded MOD APK file. After the installation is complete, you can open the application and experience as usual. Note: Before installing the APK MOD, you need to uninstall the original version or another MOD version. About Screen RecorderA completely convenient screen recording application called Screen Recorder offers users many unique functions that you certainly won't be able to ignore. So along the way, you'll be able to find what you need to create any video like streamers. At the same time, the differentiation functions that appear in the Settings section are also essential parts that you will need to adjust appropriately before creating an amazing product. SCREEN RECORDING APPLICATION WITH MANY FUNCTIONS Once you start using Screen Recorder, you will surely grasp the functions of the application entirely simply. Specifically, the recording/stop functions are designed in a completely reasonable way and meet the user's needs, so it can be said that you can find on the screen button easily to start/stop the process. From there, you will have yourself a video completely quickly and then be able to adjust the video-related elements yourself in the settings. You will notice one thing while using the application that is granting all permissions to the application. It is essential to help the application optimize many different exciting functions such as video store or turn on the mic during recording. From there, it can ultimately help you in many different cases with its diverse and valuable functions. In other words, it can be an exciting tool for those who work with video. USEFUL SCREEN RECORDING FUNCTION The only function that this application can do for you is to record your screen entirely after you have permitted it to access related functions. You can see the video record button appear on your screen, and it is perfectly suitable for many people as they can trigger the recording or stop the video at any time they want. From there, they can get themselves a thoroughly quality video. Another interesting function that you can't miss is that you can access the mic you're using. This use is beneficial for commentators or game streamers to help them quickly get the most realistic sound during their experience. In other words, you won't need to use too much software to ensure the content of your video and try to edit some elements related to your video. Having mentioned the screen recording experience, we will certainly not forget the exciting face cam function that Screen Recorder owns. The process allows you to record the front and back of the device, respectively, to the two cams of the device. From there, it makes it easy for you to deliver a completely authentic experience to your viewers. So, using the mic and using the face cam can be two functions that you can consider in using one or both, depending on your target and device. CUT YOUR VIDEO Besides the utterly convenient function of Screen Recorder, users will be able to edit videos completely by themselves just with this application. In other words, once you've got yourself a carefully prepared video, you'll proceed to cut out the unnecessary parts like you started the video. It is usually the footage without too much exciting content; most of them will include the cropped product with some intro or other exciting elements to introduce the video more interesting. Besides creating content, the app also gives you a way to help you mark your rights inside your product. Specifically, you will need to add a video featuring you, and when they look at it, they will know it is yours. It can help you get a finished piece of content before going to some other editing functionality. In other words, when you step out of the app, most of the essential elements are already in your video. SAVE VIDEOS EASILY Like many other video editing applications, users will save their videos anywhere they want by choosing the storage location. From there, they can rest assured in finding the files they have recorded, and this saving is completely done in the settings of the application. In Settings, there are many more factors that you will take the time to choose to optimize the characteristics of the video before shooting to ensure your products are entirely suitable for you. Two factors that many people are often interested in are the resolution and frame rate of the video. The resolution you can choose from is completely convenient as the app offers you different types of resolutions depending on how big your device screen is. From there, you'll be able to find what you feel is right for you. At the same time, the frame rate is also an important thing that you also need to take care of to make sure it is suitable for different devices when it is launched. Frequently Asked Questions (FAQ) Q. How to download Screen Recorder on ApkSoul.net? To download Screen Recorder Apk Mod, please click on the download button at the top of the article or at the end of this article. You will then find the Apk file on ApkSoul.net's "Download" page. Read more: Background Video Recorder - Quick Video Recorder... Reviews from users Gum pear: I love this app, and I like how it doesn't show the camera that's recording and it just records the screen really nicely this is a really good app I use this all the timeS R: This app is incredible?? Most of Screen Recorders I have downloaded wasn't the thing that I really wanted and they had a lots of problems but this one is DIFFERENT But the only thing that I'm not pear with is How to Show Touches during recording It says turn on the Developer option but I can't find any option with this name in my settingAlok Tripathi: This app is among the underrated, it has almost everything if you know what you are looking at. But I have 1 feature request : Please add a option to share the screen/recording to pc/obs like live or as it's recorded. Then I will be more than happy to purchase the premiumbuki Mioda: I was working perfectly fine for a couple months, but the audio has recently stopped working. I've tried checking if it is on, and reinstalling the app. But it won't work. Please fix this!Syntax Infinity: Was the best screen recorder out there, so many options that you could just use without having to pay some stupid "premium" but lately every time I try to record it just randomly stops recording after 5-15 seconds and doesn't save the recording either. I've tried everything from deleting/reinstalling the app to simply changing the resolution it records at, and nothing has fixed the issue.JayXagonto: Simple and easy to use screen recorder, but something is missing, whenever I stop recording the recording tab in the notification bar is closing. My phone Motorola G7 don't support background running apps. So whenever I stop recording I need to go back and start the screen recorder again and start the game or app that I want to record. It's kinda annoying to close and open again and again. I hope you guys add some features if the record has been stopped the recording tab is still in notif tab.XnCrePal 91: I liked the app and i still do, it just ngeh does not record well like it stops from time to time like 1.37 GB in and it stops, internal sound does not record internal sound now, apparently it does cancel out outside noise but it does so in the actual recording too so i have to isolate myself in a soundproof wall-ed room to record, i dont have one it works well but it just doesnt, hoping its a HUGE bug that i have so please fix thatWinter Breeze: I used this app to record my Pokémon Unite gameplay and it works fine w/ microphone (Note: I didn't turn on voice chat in-game). (Screen Recorder App Settings: Audio Source=Internal sound/Record audio=ON). Then I wanted to record my video calls in Messenger & Google Meet with the same settings... but the results are videos with no audio at all. So I tried turning off "Record audio," since you said two apps can't use microphone at the same time... The result is there's still no sound...Ayusha Shrestha: Everything is good but I found one issue, my recording was like more than 20 minutes first few minutes was fine but after 6, 7 minutes the recorded video plays on x2.0 speed. All my 30 minutes wasted? how do i fix this? +It doesn't work!! I changed to advance engine2 and it still doesn't work. I literally have no complaints about this app, quality and functioning everything is good but just it doesn't work for longer than 7 minutes recording videosgeevs k: This is a really great app, I delete and re download it alot since I don't use the app as much but it's comes out with smooth recordings but there's one thing, the audio doesn't come as 'smooth' or 'clear' idk i looked at the settings, tried cleaning my mic but it still sounds muffled! But really other then that its a great app and would recommend to anyone who needs smooth recording that this app provides. I like the app keep up the work :) Screen Recorder v1.2.6.7 (4.1M)

272021/7) · Download the setup file or installer from here. Install the software, launch the app, and on the main window click the "hamburger button" (options).
